Instructions to Authors

Publications in Physics Letters A are intended as brief reports of significant, original and tir in all fields of Physics excluding Nuclear Physics and Particle Physics which warrant rap spective authors are requested to give a short statement of the need for rapid communicatic accompanying the submission of the manuscript. In considering a manuscript for public tention will be given to:

(a) the originality of the research to be published;
(b) the desirability of speedy publication;
(c) the clarity of the presentation and the consistency of the conclusions derived.

Submission: Contributions, written in English, should be sent to one of the editors, see i

All contributions submitted will be refereed. The editors reserve the right to edit contribu essary, and to refuse papers which in their opinion do not satisfy conditions as to standa guistic corrections not affecting the meaning will be carried out by the publisher.

By submitting a paper for publication in Physics Letters A the authors imply that the pap lished previously nor has been submitted for publication elsewhere.

Preparation of manuscripts: The following requirements as regards presentation of the m met:

(1) *Manuscripts*: Manuscripts should be typed on one side of the paper, with double margin. The title page should contain title, author(s), address(es) and abstract. start on a new page. All pages should be numbered.
(2) *Length*: The length of the papers is not formally limited, but expedient and comp propriate to a letters journal, is expected. The editor may require the removal o troductions, derivations, descriptions of apparatus or speculations if these are no ficient and clear communication of important new results.
(3) *Title*: The title should be brief and such that it conveys to the informed reader th the contents of the paper.
(4) *Abstract*: An abstract of less than 50 words is required. It should contain the keyw well as the essence of the results achieved.
(5) *Address*: The name(s) of the author(s) and the name and address of the institu work was done should be indicated on the manuscript.
(6) *Figures*: The drawings for the figures must be submitted on separate sheets, drav and carefully lettered (with the use of stencils). The lettering as well as the ess have proportionate dimensions so as not to become illegible or unclear after the u printers (ideal lettering size after reduction of the drawing to one-column width is ings should preferably be of the same size as the typescript and designed for a red of two or three. Each drawing should have a figure number and a caption; the ca lected on a separate sheet. The appropriate place of each figure should be indicat stead of original drawings, sharp and contrasty glossy prints of about typescript siz If requested, original drawings will be returned to the author(s) upon publicati
